

Products under REACH

We are presently preparing the registration under REACH. For REACH it is of paramount importance to secure the safe use of the substances during their whole life cycle. This requests an intensive discussion with suppliers and customers and we are getting in contact with them at the moment.

INTOCAST AG is going to pre-register all their substances presently on the market. Definitely, INTOCAST AG will inform their customers if there is any important influence on the products.

We have established a package of measures considering all requirements and duties for the substances in our products. We kindly ask for your understanding that for the time being no final information about the pre- and/or final registration can be given. Here, we depend on the information and cooperation of our suppliers. For this reason we can presently also not fill in any questionnaires. We assume that all producers and suppliers will use the chance of pre-registration in order to make maximum use of the transitional periods for „phase-in“ substances, ranging from 3,5 to 11 years.

For any additional questions to REACH please contact:
